New Delhi, India

# ANAS ASLAM

## Profile

Azure Technical Lead with 4.3 years of experience in managing, securing, and optimizing Microsoft Azure infrastructures. Proficient in Azure Virtual Machines, Azure Migration, VMware vSphere, Hyper-V Management, Storage Accounts, Virtual Networks, and Microsoft Entra ID. Strong knowledge of Microsoft Defender for Cloud, Azure Sentinel and incident response to ensure secure, compliant, and high-performing environments. Strong track record in troubleshooting, performance tuning, and cloud resource optimization. Collaborative team player skilled in aligning cloud strategies with business requirements and implementing best practices for operational excellence.

## Employment History

### Technical Lead at Concentrix, Gurugram

10/2024–Present

- Provisioned Azure VMs with optimal sizing, region selection, availability, networking, and secure OS configurations
- Deployed Azure VM Scale Sets for auto-scaling based on CPU thresholds
- Implemented Azure AD for user and application management; hands-on with Entra ID, RBAC, MFA, Conditional Access, and PIM Implemented
- Worked on configuring and managing Azure Site Recovery (ASR) and Azure Backup to enable workload replication, disaster recovery, and failover readiness for critical business applications.
- Performed migration of virtual machines and databases to Azure.
- Diagnosed and resolved migration-related issues, providing timely solutions to minimize downtime and business impact.
- Designed and managed hybrid cloud operations, ensuring secure connectivity between datacenter and Azure via VPN Gateway/ExpressRoute while adhering to IT security and compliance standards
- Collaborated with cross-functional teams to gather migration requirements, develop project plans, and ensure seamless execution.
- Set up Azure Monitor and Log Analytics for performance tracking, log collection, and alerting
- Familiarity with vulnerability management, risk assessment, and security compliance standards
- Managed major incidents through ServiceNow and BMC Remedy, ensuring timely resolution and SLA adherence
- Collaborated with Customer Success Account Manager (CSAM) community, delivering data-driven insights to improve customer experience

## Skills

Virtual Machine  
Azure vNET  
Azure Migration  
Microsoft Entra ID  
Azure FinOps  
Terraform (Infrastructure as Code – IaC)  
Database Migration Service (DMS)  
VMSS  
Load Balancer  
Azure Storage  
VMware vSphere  
IAM  
Microsoft Defender  
Virtualization Resource  
Provisioning  
Azure Monitor  
Azure Advisor  
Terraform  
ITIL  
Linux  
ServiceNow  
SolarWinds  
BMC Remedy  
Microsoft Office 365  
Hyper-V Management  
IaaS  
Paas  
PowerShell

- Documented operational procedures, incident reports, and knowledge base articles for repeatable support in hybrid cloud and on-premises environments.

## Senior Analyst at HCL Technologies, Noida

06/2021–09/2024

- Configured and managed Azure AD Connect, alongside hands-on experience in user management within Active Directory
- Handled Azure disk issues including slowness, detection errors, and resizing by using premium disks
- Configured Azure Load Balancer to enable and manage internet access for virtual machines, ensuring optimized traffic distribution and connectivity
- Managed Azure FinOps practices to optimize cloud costs, monitor usage, and improve financial accountability across cloud resources.
- Managed outage handling and documentation to support effective incident response
- Ensured application continuity through disaster recovery planning by setting up and managing Azure Site Recovery for critical workloads.
- Supported day-to-day operations of hybrid datacenter environments by monitoring Azure resources, VMware vSphere clusters, and Hyper-V hosts for availability, performance, and incidents.
- Planned and executed workload migrations from on-premises VMware/Hyper-V to Azure using tools like Azure Migrate, ASR, and Storage Migration Service (rehost, refactor, or modernize).
- Partnered with cross-functional stakeholders to define migration objectives, develop project roadmaps, and implement tailored Azure solutions.
- Familiar with CI/CD methodologies and tools for DevOps practices.
- Proficient in Microsoft Defender for Cloud, Azure Sentinel, and Key Vault for securing and monitoring Azure environments.
- Applied basic Terraform skills to provision and manage Azure infrastructure.
- Monitored network infrastructure endpoints using monitoring tools such as SolarWinds and Zabbix to maintain optimal performance.
- Performed troubleshooting of Office 365 issues, including Outlook, Teams, login, and sync errors, ensuring seamless user experience
- Applied ITIL best practices in Incident, Request, and Problem Management Created knowledge base articles to improve ticket documentation and customer understanding of services.

## Education

### Bachelor of Technology (B.Tech), Teerthanker Mahaveer University

09/2010–10/2015

## CERTIFICATION

Microsoft Azure: Networking Concepts

Git Essential Training

Microsoft Certified Azure Administrator Associate

A Standalone Project: Migrate Applications to Azure Virtual Machine (VM) as PoC

Complete Guide to Incident Response for Security Analysts

ISO 27001:2022-Compliant Cybersecurity: Getting Started

## Languages

English  
Hindi

## INTERESTS

Learning new technologies and applying them effectively.

Working in environments that encourage innovation and creativity.

Problem-solving and delivering high-quality results.

LinkedIn

# STRENGTHS

## Problem-solving Skills

Strong problem-solving and analytical skills

## Adaptability

Adaptable and quick to learn new technologies

## Teamwork Skills

Excellent communication and teamwork abilities

## Attention to Detail

Strong attention to detail and maintaining documentation
